BOOK

HIP TO BE CUBE

A funky new guide helps you give your cubicle a makeover

IF YOUR CUBICLE IS LIKE MOST, it's a lifeless, colorless work stall that contains no soul beyond the family photos on the desk and the comic strips taped to the computer monitor (oh, Dilbert, what will you say next?). Thankfully, our resident lifestyle and entertaining guru Kelley L. Moore has created *Cube Chic* (April 2006, Quirk Books, \$15.95)—a fun and funky guide to snazzin' up your work space. *Cube Chic* features 22 themed designs—from the Tiki Cube, replete with tropical wall paper and hula skirts, to the Astroturf-covered Golf

Cube—with step-by-step decorating directions for each. Moore recently stopped by our offices, was appalled by our naked cubicles and promptly whipped up this timely cube (baseball season starts this month) for senior associate editor Monica Fischer. Although not featured in the book, the Mariners cube contains the Martha-like ingenuity and attention to detail found throughout *Cube Chic*. So bust out the glue gun and give your wannabe-office the extreme makeover it deserves. Just check with the boss first. *Chris Clayton*
